Pre writing #1

How will this class help

- improve my writing
- make me understand how engineers write

- improves the fight to climate change
- gives a inspiration to others to help fight.

How will this help the world.

- dedication
- time
- interest
- like

Problems

- learn more in engineering and get an internship

How

- Help fix the climate change crisis
- mechanical / electrical
- Bachelors degree

why

- interested in technology
- fix climate change.

future me

- Can be content with what i do
- could want to do more and improve

Pre writing #2

I used to hate writing and reading but when getting into college I understood if I want to succeed I would need to improve and get used to it. I needed to write college entrance essays apply to internships and have a better understanding with Reading as most classes in college it is a requirement to keep up.

FCWIS taught me a little more and gave me a better understanding on what I should be doing, why I should be doing it, and improving how I do it. So from there I have steadily improve more but there is always more room to improve.

Antecedent \leftrightarrow Pronoun

Syntax: the order of a sentence and the "length," ^{1 per} page.

in technical writing

should be the short and more information.

Free write #2

My strengths as a writer is identifying what I want to write about and or envisioning a plan in my head. what I believe I should improve of this skill is writing these ideas down it will help due to keeping them for future reference on the writing im doing. I also want to improve on filters. I use words that can be really redundant. Another I have a

a writer is how I can feel if
something is off either writing. what
I can improve how to identify my in the

The modern technology that
I got reminded of was sensor
that activate lights if say this
because of the amount of lights
I have at home. Also I am
reminded of the advancement
in robots as it makes jobs
easier and the return of
investment making it cheaper.

Free write: Structure \longleftrightarrow substance

I believe that the Lab report
Named ED906154 from Michael
Harris. I say this because from
my basic knowledge about quantum physics
it is better to learn about this
topic visually and of very descriptive
way where people can understand. I believe
that this lab report has done this
right while the other Lab reports
seem to be for people that have
some sort of understanding of the
topics mentioned. To me this isn't helpful
when I don't understand the simple
basics of Quantum Physics.

Thesis academic essay.

Critical reports.

• 1 sentence = argument for essay.

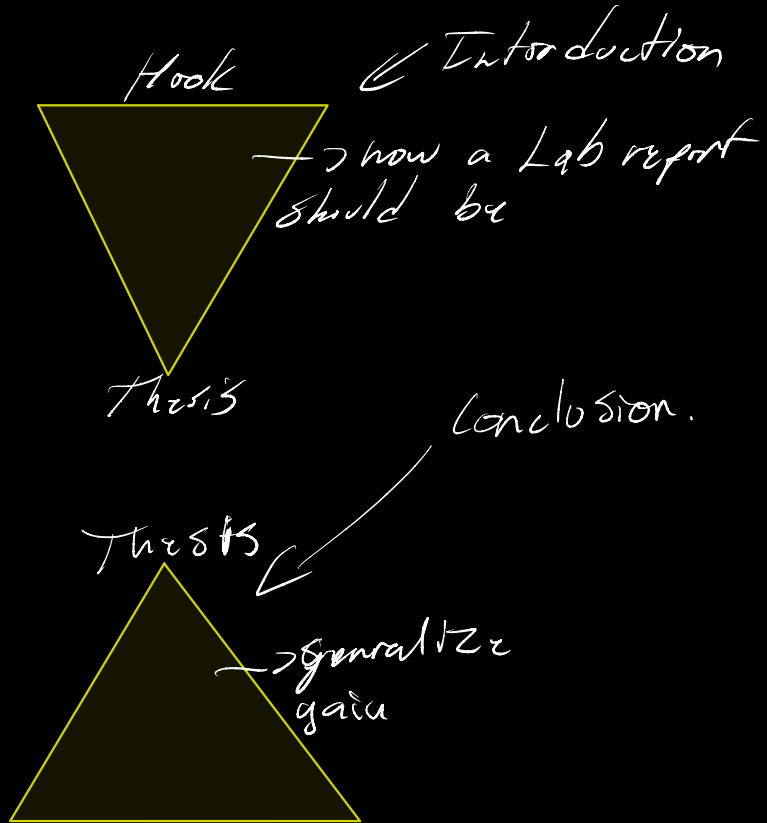

include all three lab report

or APA Citations.

H.W. Outline and Thesis

Free write: what fear most about
the rhetorical analysis essay is my understanding
or knowing good writing skills. I say
this because in this assignment **I**
have to figure out and critique
others writing. I believe that
I don't even have the skills
critique my writing. So realizing to
identify others weakness might be the
hardest part of this assignment.

Another thing I believe I will
struggle with is the thesis. I
do not believe that I can follow the
certain idea of an outline in what I can
provide true information.

be redundant, specific,

- be detailed and cover the
topics listed in the thesis.

Free write: The weakness I have in this essay is the way to develop more evidence from the lab report. I know what im writing about but the information and selecting the right information for my writing. Another problem I have is the length for the essay. I do not believe that can write enough for the requirements of the story. I should give more explanation of more.

Freewrite: Technical description.

Pens and pencils: help improved
portability, improvement in writing

Watches and clocks: help tell
time, created time zones.

~~Paper: help the convenience of
having some thing to write on~~

~~Mirrors: gives people a way to
view themselves.~~

The type writer/keyboard:
helped people get to type faster
present information

The internet!

The recording and out putting
sounds. hear recording sounds.

Pianos / key instruments.

Shoes / sneakers!

Book bags / transportation of
goods.

The Zipper:

Have more priority more technical

Free write: What I have learned
from this article and what I
can apply to my technical description
is showing the benefits that
a product can have. I say this
because when writing a tech description
I should talk about how a product
has improved and the benefits
to either to society and or the
development onto other technologies.
What I can say is that I can
also take from this is the story
to the reason why for the development.

I can also think critically
on where the innovation is
most impactful either in
society and or regions where
it is either new to them
or drastically

Free write: Punctuation has never really
been a good thing with me. I have
never been particularly good with
it and really struggled with
the way I use it. I can say
that I have developed it much
more through the years but
I don't see it near to perfect.
I feel like there is much more to
be learned and improvement. I believe
that I have a long way to go
from ever being close to using good
punctuation and grammar. I think it's a
skill that is needed to be consistent.

Freewrite: language in a sense can be a technology depending on the way you look at it. For example Python or Java script those are computer software languages, they can be taught and read like a language, they can also be developed and added on to like a real language.

In the context of the story when Louise has figured out the how the writing of the aliens are structured she noticed that the spoken language is different to written language when she first discussed about the written language that
